

Installation Package

No worries about installation

Your Fast & Fluid dispenser is fully installed for you, including software installation. Then everything is thoroughly tested. An operator is trained how to use the machine and he is also shown which parts of the machine he should pay special attention to when performing maintenance.

The Fast & Fluid Care Installation Package: a swift, trouble-free start with your new dispenser. If required, the shaker/mixer can also be installed. Contact us to find out about the different options.

When you purchase the Installation Package you get a 10% discount on the 3- or 5-year Spare Parts Warranty. In addition you get 6 months full service free after the installation.
