

Automatic dispenser

Harbil 150 [HA150]

PRODUCT INFORMATION

- St. steel Twin Ball Valves®
- Dispense speed up to 0,4 L/min
- Shot sizes down to 1/576 fl.oz.
- Up to 24 canisters
- Central punch optional
- High value for money

The HA150 is a fully automatic dispenser with Twin Ball Valve® technology and a low Cost of Ownership as a result of the A-brand components used. This dispenser is especially designed for DIY and/or small retail outlets and requires limited attention for machine maintenance. Next to this it's very suitable for waterborne and solvent-based colorant systems.

The HA150 can be equipped with up to 24 polymeric canisters of 2.3 liter. Next to this 2.3 liter canisters are optional with a maximum of four canisters per configuration. Furthermore centralized automatic bottom stirring and a fully automatic brushing system for perfectly clean nozzles are standard. The machine is available as floor model with adjustable manual can table.

The HA150 can be equipped with stainless steel panels for a high quality exterior and easy cleaning and a can positioning device for better can positioning. An improved manual punch is optional as well.
